

Science V Space Request Form

Space in Science V will be assigned based on the criteria outlined in the Science V Operating Policy. Complete this form to request space in Science V. Completed forms should be returned to Bob Snyder in Laboratory Animal Resources by March 15, 2010.

Science V is intended as a secure animal facility, predominantly rodents. As such, non-animal activities must be conducted outside of Science V.

Name: _____

Department: _____

Research Group:

Please indicate the number of people, including yourself, in your lab group.

Undergrads	Grads	Faculty	Visiting Faculty	Post Docs	Technicians	Other

Holding Rooms

Holding room space will be based on current census data of animals and current light cycle requirements and separation requirements.

- Please describe your ability/inability to have your animals housed with other researcher's animals.

- Please describe any significant changes that you anticipate in the way that you will be using animals in terms of numbers, species, or requirements when the building opens in fall 2011.

Testing Rooms

_____ # Large Testing Rooms Requested

_____ # Medium Testing Rooms Requested

For each testing room that you are requesting, please complete a testing room sheet.

Science V Space Request Form

Testing Room Sheet

Please complete this sheet for each testing room you are requesting.

Testing Room Label _____

Please either designate the testing rooms sequentially, e.g. Medium Testing Room 1, Medium Testing Room 2, or provide a name, if applicable.

Describe the functions that will occur in the space.

Describe how frequently the space will be used.

Describe the scientific need for the space to be dedicated to this particular function.

Describe the ability to share the space with other researchers.

Describe any required adjacency to specialized spaces such as the perchloric acid hood, surgery suites, etc.

Science V Space Request Form

Wet/Dry Lab

Will you need dry lab space in the facility? _____

If so, can the space be shared with other research groups? _____

How many people will use the space and how often? _____

Wet labs are designed as shared open labs.

Will wet lab space be needed? _____

Location

Please list any researcher with whom you are collaborating and need to be located in close proximity.

Please describe any other special location requirements.

Other Non-Animal Space Needs

Do you conduct non-animal research that will require additional space outside of Science V? If so, please describe the function and type of space that will be needed.
